

Tornado Safety & Preparedness

Statewide Tornado Drill (including a NOAA Radio test) will be conducted at 9:30 A.M. CST Wednesday, February 27, 2019.

<https://www.weather.gov/safety/tornado>

A tornado is a violently rotating column of air extending from the base of a thunderstorm down to the ground. Tornadoes are capable of completely destroying well-made structures, uprooting trees, and hurling objects through the air like deadly missiles.

Tornadoes can occur at any time of day or night and at any time of the year.

This website is designed to teach you how to stay safe when a tornado threatens. If you know what to do before, during and after a tornado, you will minimize your risk of injury and increase your chances of survival. You'll also find links to research, past events other topics of interest as well as downloadable safety handouts about thunderstorms, lightning, and tornadoes.
